The Trusted Team

Celebrate Strengths and Increase Engagement

In our busy, fast-paced environment it's easy to forget to take the time to demonstrate gratitude to each other.

An amazing and effective team is one that appreciates strength and values differences. Character strengths are the ingredients for living our best life. High-performing teams focus on strengths and build on what's right, rather than focusing on what's frustrating them.

In this light-hearted workshop, we'll explore which strengths work well together, which strengths clash, and how to spot strengths in others. This team workshop is designed to promote trust and grow an open, engaged and positive team.

We'll teach your team

- Discover your individual 24 character strengths
- Learn how to harness your strengths for growth and development
- Spot the dangers of overusing and underusing strengths
- Rebuild relationships after strengths clash
- Spot strengths in others to help bring out the best in each other.

After the workshop you'll find your team focuses on each other's strengths and celebrates successes. You'll see them working more collaboratively, solving problems more creatively and focusing on the bigger picture.
