Understanding Yourself and Others

Improve Communication and Reduce Conflict

Working in small teams and a fast-paced environment can place strain on relationships and cause personalities to clash. This stress can create misunderstandings, build resentment and cause conflict.

This workshop explores each Educator's unique working style and how you can use them to strengthen relationships and bring out the best in each other.

We'll teach your team:

- The essentials that make an effective team and how to implement them
- Which styles clash and how conflict can be avoided so the children remain the priority not the friction
- Practical tools to increase communication and support each other despite the differences
- Skills that allow them to respect, appreciate and approach different communication styles.

After the workshop, Educators will have a genuine respect and acceptance of opposing personality styles. Moving forward as your team begins to implement their new-found skills you'll see reduced conflict, improved collaboration and more team harmony.

Give your team the chance to reduce the conflict and improve communication. Call us on 1300 366 896.

Completing Understanding Yourself and Others will contribute 2 hours of NESA Registered PD addressing 6.3.2, 7.2.2, from the Australian Professional Standards for Teachers towards maintaining Proficient Teacher Accreditation in NSW.
